

The MPX control system is supplied with a factory-implemented application for remote monitoring and management of the operating parameters of the units in real time via a web browser on any mobile device.

MPX MANAGEMENT SYSTEM:

- Displaying visualisations on any devices - from PC to mobile devices
- Monitoring and management of the majority of devices from the open visualisation of a single unit
- Easy and intuitive change of the operating mode of the unit using a central button
- Tools for supporting easy and quick setup of the optimal operating schedule of the unit

ENERGY MANAGEMENT SYSTEM

MPX
modular air handling units

VISUALISATION

Advanced algorithms apply optimised conditions to suit any environment and offer three different operating modes: eco, optimum and comfort. Simple visuals provide the capability to control variables including temperature, fan efficiency, air quality, humidity and CO₂ to minimise costs and maximise efficiency whilst maintaining the perfect indoor environment

Operational Calendar

Parameter Monitoring

Energy Use & Savings

DIAGNOSTICS	CONVENIENCE	OPTIMISATION	ECONOMIC	RECORDING
Remote diagnostics and support by service personnel	Remote access and parameter change via LAN or web	Quick set up to optimise each operating parameter	Real time monitoring of energy usage & operating costs	Recording of operating parameters and alarms/warnings
