

# FORMBY HALL SOUTHPORT

## PROJECT PROFILE

“Mansfield Pollard designed the perfect system within the challenging constraints of our building. The installation team worked tirelessly and I would highly recommend and use them on all future projects”

Phil Roberts - Hotel Operations Manager, Formby Hall Golf Resort & Spa

## CHALLENGES:

To provide a **full ventilation solution** for the new banqueting kitchen at one of the most exclusive wedding venues and golf resorts in the north of England.

Unique challenges included **low ceiling heights**, large supporting steel columns & beams and extremely **limited plant space**. An extensive central cooking island was required with an airflow rate in excess of 5m<sup>3</sup>/s.

**Stringent noise control** was necessary with both the 18th tee and wedding reception balcony area being in close proximity to the exhaust point.

## OUR SOLUTION:

A customised **total ventilation package** was designed and installed to fit around existing services and low ceilings. An external **bespoke steelwork frame** resolved the issue of limited available plant space and our expert acoustic engineers designed an **attenuation system** to deal with the critical noise complications.

A **partnership approach** with both the end user and main contractor was essential to ensure zero kitchen downtime and allow a wedding booked only four days after the planned commissioning date, to go ahead as scheduled.

 **5m<sup>3</sup>/s ISLAND CANOPY**

 **BESPOKE ATTENUATION & CONTROLS**

 **ONE COMPANY FROM DESIGN TO COMMISSIONING**

 **100% ON-TIME & ON BUDGET**

  
**KITCHEN VENTILATION**
