AHU MAINTENANCE CORRIDORS

*“External ventilation units should be fully weatherproof to IP65 and secured from unauthorised access. Protection against the elements should also be provided for personnel carrying out routine inspection and maintenance activities
As an example, when two units are outside, and they are installed with their access doors facing each other, if the gap between them is roofed over and the open ends capped, the AHU’s themselves create what is in effect a plantroom”.*

*Extract from Health Technical Memorandum 03-01
Specialised Healthcare Ventilation for Healthcare premises Part A*

OUR MAINTENANCE CORRIDORS ARE FULLY CUSTOMISABLE:

- options for raised roof to house pipework, electrics etc.
- choice of bases - PFC, aluminium hospital style, stainless steel
- door furniture options include emergency push pad, slam doors
- Open tread or sheet flooring with options for access and penetration points.

Our AHU Maintenance Corridors are manufactured to the same exacting standards and superior quality as the HTM 03-01 air handling units they are protecting:

Corrugated roof with weatherproof flashings

Lockable access doors with internal door release facility

Welded & Fully Weatherproof

Galvanised common base frame mounting

Reinforced framework with integral gusset pieces

IP 65 rated LED lighting

Clipped cabling with optional encasement and protection

Galvanised flooring

Anti-trip joining plates
